AP CSP (3), AP CSA (4), AP Cal BC (5), AP Microeconomics (5), AP Macroeconomics (5), AP English Language and Composition (4), AP Statistics (5), AP Physics/Chemistry (4)

Awards/Accomplishments

Wharton Business Journal
Senior Care Center
Lacrosse Player of the Team Award

Data Science Projects

Project: SJA CS Club   Jeju, Korea

Volunteered at the SJA CS Club. Led interactive computer science and English lessons for over 50 elementary school students. I integrated programming concepts with language activities to help students improve both their technical skills and English language skills, with over 90% making significant progress. I also increased student engagement by implementing one-on-one interactive lessons. I worked with fellow volunteers to improve curriculum quality and turn around student learning outcomes.

Project: Stanford Summer Camp Final Project   Boston, MA
                                                                                                           July 2024
In order to determine the truth of one of the baseball proverbs, that the number of home runs varies depending on the stadium, and that this is a unique characteristic of each stadium, we completed a project using R to show the correlation between 30 stadiums and the number of home runs.

Project: Wharton Summer Camp Final Project   Boston, MA
                                                                                       June 2024 – July 2024
Conducted a project to find the optimal age through the correlation between F1 debut age and career performance. As a result, we concluded that the debut age does not have much meaning for players who debuted between the ages of 20 and 30, as long as they are not too young or too old.

Class Project: Harvard Data Science and Visualizing Class Final Project

Research Experience

Space Radar   Seoul, Korea
Role: Research Intern
I am currently interning at [Space Radar](#), South Korea's premier space information portal. I conduct research, prepare written reports for the website, create short form videos, conduct research on international space issues, and summarize reports.
